

SMART INDIA HACKATHON 2026

IDEA SUBMISSION (SOFTWARE EDITION)

Problem Statement ID : [SIH26094](#)

Problem Statement Title : AI-Powered Dynamic Mental Health Monitoring and Distress Prediction System for Victims of Atrocities

Ministry / Organization : Ministry of Social Justice and Empowerment (MoSJE)

Department : Department of Social Justice and Empowerment

Theme : MedTech / BioTech / HealthTech (AI/ML & Cloud)

PS Category : Software

Team ID : [141444](#)

Team Name (Registered on portal) : [DEKO](#)

Team Leader : BALAJI P (balajikrishnan031@gmail.com | +91 9342636595)

Team Members : NAVANEETHAM V, MALINI V, DHAVAN R G (IV Year),
DEEBIKA S, DHARA R (II Year) - B.E CSE

College / Institute : University College of Engineering, Panruti (Anna University)

PROPOSED SOLUTION & CORE CAPABILITIES:

- **Continuous Post-Complaint Care:** Proactively monitors atrocity victims (SC/ST PoA Act 1989 / NHAA 14566) across legal trial & rehabilitation phases with automated check-ins.
- **Omnichannel Multimodal Ingestion:** Hooks into NHAA 14566 SIP lines, Citizen Web portal, Chatbot API, SMS & Mobile App with DPDP-compliant consent.
- **Dynamic Distress Scoring (DDS 0–100):** Continuous multi-vector metric $DDS = 0.25E + 0.20V + 0.15B + 0.15H + 0.10C + 0.15T$ combining emotion valence, vocal tremor, behavior & legal delays.
- **72-Hour Longitudinal Crisis Forecasting:** Computes distress trend velocity ($dDDS/dt$) over 7-day rolling window to forecast crisis 72 hours prior to acute escalation.
- **3-Tier Risk Bands & Action Matrix:** 0–30: Self-help grounding audio | 31–60: Tele-counselling intervention | 61–100: Real-time emergency alert to DM / SP dashboard & crisis dispatch.
- **Explainable AI (XAI) & Human Gate:** SHAP/LIME point attributions (+24 threat cue, +18 vocal tremor, +15 case delay) ensure auditable decision transparency.

Victim Experience & Multichannel Hub (14566, Web, Chatbot & App)

- **Omnichannel Multi-Access:** Direct toll-free 14566 calling, Citizen Web portal, Tanglish Chatbot & Mobile App SDK.
- **Tanglish & Multilingual AI:** Native support for Tanglish (Tamil-English), Tamil, Hindi & English with voice dialogue.
- **Calm Space & Silent Sanctuary:** Interactive emotion wheel, Box Breathing (4-4-4-4) & non-verbal Silent Mode tracking.

District Magistrate, Police & Tele-Counsellor Command (Triage & Case Action)

- **Unified Real-Time Distress HUD:** District map visualizes victim distress velocity, hotspot clusters & overdue relief.
- **Automated Red-Band Alerts:** Real-time emergency escalation to DM, SP & designated counsellors when score > 60.
- **Statutory Relief Tracking:** Tracks Section 15A witness protection protocols and Rule 12(4) stage-wise relief disbursement.

72-Hour Crisis Early Warning

Distress velocity ($dDDS/dt$) predicting crises 72 hours prior.

Tanglish & Low-Bandwidth Mode

Full offline grounding audio, low-data layout & SMS fallback.

3-Tier Multi-Agency Action Matrix

Self-help -> Tele-counselling -> DM/SP witness protection.

Idea / System Architecture Flow:

1. Omnichannel Ingest

14566 SIP PRI lines, WebRTC mic, Chatbot API & Mobile App SDK (8/16kHz PCM)

2. Multimodal Signal Extraction

Vocal acoustic prosody (pitch tremor Hz, jitter %, pause duration) + BERT fear valence

3. Dynamic Distress Scoring (0–100)

Continuous formula: $DDS = 0.25E + 0.20V + 0.15B + 0.15H + 0.10C + 0.15T$

4. 72h Crisis Forecast & Explainable AI

Time-series trend velocity (dDDS/dt) predicts crisis 72h prior + SHAP point attributions

5. Automated 3-Tier Risk Action Dispatch

0–30: Self-help grounding audio | 31–60: Tele-counselling | 61–100: Emergency DM/SP alert

Technical Stack & Security:

- **Speech & Emotion DSP:** Python (NumPy, SciPy, Librosa) 20ms frames, vocal tremor analysis.
- **AI / NLP & Predictive Engine:** Hugging Face Transformers BERT, velocity forecasting (dDDS/dt), XAI.
- **Telemetry & Secure Ledger:** FastAPI ASGI server, PostgreSQL, Redis cache, AES-256 GCM vault.

Workflow Comparison Matrix:

WORKFLOW FEATURE	CONVENTIONAL WORKFLOW	KEFI AI PLATFORM
Voice Triage	Manual assessment & referral	✓ Proactive Care Scheduled check-ins
Multilingual & Channels	Varies by channel & availability	✓ 22+ Languages Tanglish / Web / 14566
Triage Framework	No standardized composite index	✓ Mathematical DDS 0–100 multi-signal metric
Emergency Escalation	Manual emergency workflow	✓ 72h Early Warning Predictive velocity dDDS/dt

20ms Frame Acoustic DSP

Linear PCM stream ingestion, pitch & vocal micro-tremor extraction.

Mathematical DDS Architecture

$DDS = 0.25E + 0.20V + 0.15B + 0.15H + 0.10C + 0.15T$
multi-signal.

Multi-Agency Integration Layer

112/medical/protection/legal integrations demonstrated through prototype adapters.

ANALYSIS OF THE FEASIBILITY:

- **Technical Feasibility:** Prototype benchmarked with initial acoustic DSP & NLP inference latency below 250ms.
- **Operational Feasibility:** Seamless integration with MoSJE NHAA 14566 PRI lines, Web portal & App.
- **Legal & Ethical Feasibility:** Aligned with SC/ST PoA Act 1989 (Sec 15A & Rule 12(4)) and DPDP Act 2023.

VIABILITY & SCALABILITY:

- **Cost Viability:** Projected prototype operating cost: <₹0.15 per check-in; zero costly hardware required.
- **Reliability & Scalability:** High-availability cloud architecture with offline caching, Low Internet Mode & fallback.

PROBLEM VS SOLUTION

✖ PROBLEMS

- **Subjective Triage:** Check-ins are irregular, subjective, and absent during legal delays.
- **Delayed Detection:** Distress escalation goes unnoticed until acute harm occurs.
- **Witness Threats:** Coercion goes undetected, causing witness hostility in court.
- **Disconnected Logs:** Paper registers leave DM & SP unaware of localized crisis trends.
- **High Workload:** Manual welfare follow-up is impossible across thousands of cases.

✔ SOLUTION

- **Objective Scoring:** Automated continuous monitoring via mathematical DDS metric (0–100).
- **72h Early Warning:** Longitudinal velocity (dDDS/dt) alerts counsellors 72h prior to crisis.
- **Threat Screening:** NLP flags coercion keywords ('dhamki', 'withdraw') for Sec 15A protection.
- **Unified HUD:** Live map alerts DM, SP & MoSJE to localized distress velocity spikes.
- **70%+ Overhead Cut:** Automated check-ins and AI triage free officers for high-risk care.

High-Availability Architecture

Tested prototype; sub-250ms median API latency; automated failover.

DPDP Act 2023 & Rules 2025

SHA-256 tamper-evident audit ledger & AES-256 GCM encrypted audio vault.

Fail-Safe & Low-Confidence

Deterministic P1 safety override + low-confidence human verification fallback.

Key Impacts on Victims & Institutions:

01. **72-Hour Suicide & Crisis Prevention:** Critical distress detected 72h prior, enabling timely tele-counselling & Sec 15A protection.
02. **Single-Window Trauma Continuity:** Victim recounts ordeal once; structured statutory dossier routed to all departments.
03. **Witness Protection & Justice Trust:** Real-time threat detection triggers Sec 15A protection, reducing hostile witness rates.
04. **Rule 12(4) Relief & Rehab Tracking:** Supports stage-wise relief, sanction and 7-day monitoring + welfare coordination.
05. **70%+ Administrative Overhead Cut:** Automated check-ins and smart triage free officers for complex crisis response.

PS Expected Outcomes Compliance Matrix:

PS EXPECTED OUTCOME	KEFI AI IMPLEMENTATION	STATUS
1. Early Identification	Automated scheduled check-ins via IVRS 14566, Chatbot, SMS & Web portal	✓ Addressed
2. Counselling & Rehab	Mathematical formula DDS (0–100) combining 6 trauma signals & delay factors	✓ Addressed
3. Victim-Centric Redress	72-hour crisis velocity forecasting (dDDS/dt) predicting acute trauma before escalation	✓ Addressed
4. Resource Allocation	3-Tier risk dispatch: DM/SP emergency alert, tele-counselling & self-help grounding	✓ Addressed
5. Enhanced Responsiveness	DPDP Act 2023 compliance, AES-256 encryption, OTP consent & audit trail	✓ Addressed

Outcome 1: Tanglish Chatbot

Outcome 2: Emotion Wheel

Outcome 3: Calm Sanctuary

Outcome 4: 7-Day DDS Trend

Outcome 5: Officer HUD

Statutory Acts & Policy References:

- **Scheduled Castes & Scheduled Tribes (PoA) Act, 1989:** Section 15A (Rights of victims & witnesses, including protection) & Section 18A (FIR registration provisions).
- **SC & ST (PoA) Rules, 1995:** Rule 12(4) — Relief and Rehabilitation framework, including prescribed relief provisions and seven-day service requirement.
- **Digital Personal Data Protection:** DPDP Act, 2023 and DPDP Rules, 2025 for data fiduciary duties & consent.
- **National Helpline Integration:** MoSJE National Helpline Against Atrocities (NHAA 14566) continuous linkage.
